Product Specifications

- * Forenta-Saratoga Storage Conveyors now feature Direct Drive Motors with soft-start and stop. Cat drive available for high-rise models.
- * Special sizes and configurations available.
- * Hangers are adaptable to use numbers or bar codes.
- * Conveyors include hand and foot switches for forward and reverse rotation. Auto-Trol Microprocessor available for automatic location of multiple orders.
- * Solid steel frame with modular design allows for expansion as required.
- * Electro-galvanized steel track, rust free, and die cast aluminum yokes with nylon ball bearing wheels insure smooth and quiet operation.
- * Rotating parts use sealed ball bearings which minimize lubrication and lessen the possibility of lubricant leakage.
- * Storage conveyors measure 52-inches wide with garments.
- * 120-230 volt/50-60 cycle/1 phase, 1.8 amps with single drive, 3.6 amps with dual drives.

Auto-Trol Microprocessor

- * Automatic or manual operation
- * Multiple locations can be keyed in
- * Automatically selects shortest route to garments
- * Program to retrieve locations in order of input or shortest route
- * Can be mounted on conveyor or counter
- * Can be used in conjunction with foot or hand switch
- * Two Auto-Trols can be used
- * Easy-to-read display
- * User-friendly – easy to program, easy to operate
